Argenia

WATER SYSTEM

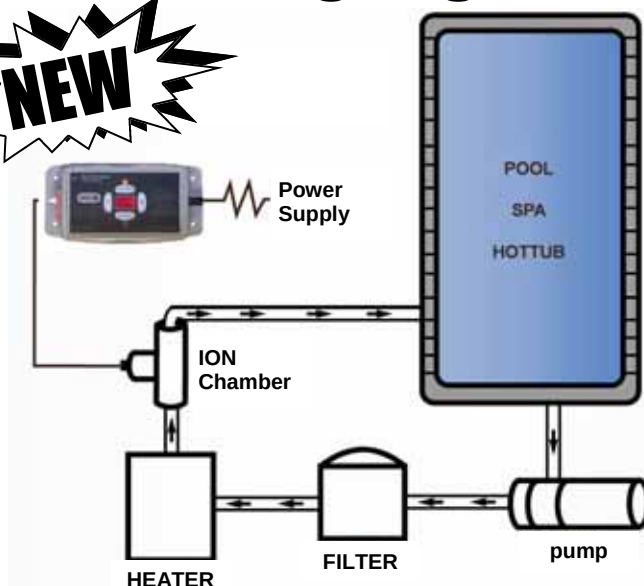

An Alternative for Controlling Algae

HOW DOES IT WORK?

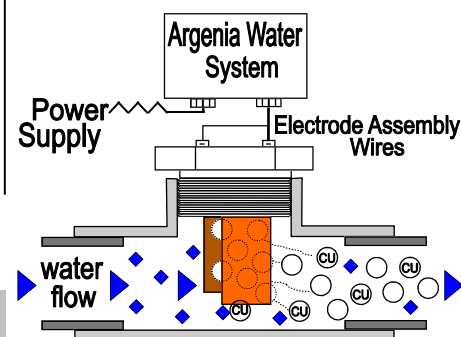

In very basic terms, the Argenia Water System™ works as follows:

A pure electrode is placed in a chamber. This chamber is mounted in the recirculation system of a pool or spa. A safe low voltage DC current controller sends signals to the anode causing microscopic particles (ions) to be dispensed into the water as it passes through the chamber.

- CSA Certified
- Registration # 29954 Pest Control Products Act
- Extremely Stable Residual Effect
- Relieves Allergies or Sensitivities to Chemicals
- Non Corrosive to Equipment
- Improve water quality and clarity

OZONATORS

SKU Number	List Price	Code	Description
GECKO OZONATOR spa.o₃			
Gecko's new spa.o₃ corona discharge generates ozone that is injected in the spa water by an air suction effect. The generated ozone travels from spa.o₃ through its flexible plastic tube and mixes to the water in the spa plumbing. The longer ozone and water can mix together before entering the spa the better. Can be installed flat or wall-mounted horizontally or vertically. It comes with a check valve and a 6 foot tube to inject ozone in your spa system • High Output • Corona discharge • 120 volt

UV STERILIZER

Trident™ Ultraviolet Series 5

Introducing a new level of high performance UV sanitation systems ... at a cost heretofore not available.

By immediately neutralizing the micro organisms that are resistant to old fashioned sanitation methods (including chlorine and salt chlorine generator systems) the maximum sanitation level is achieved and the highest water quality is produced.

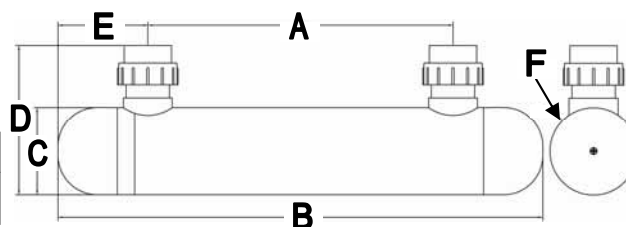

The Series 5 UV System is designed for spas with either low flow Circ Pumps or high flow Jet Pumps and can be converted to 44GPM up to 88GPM

Through innovative design and applying the latest "Green" UV technology, Trident's engineers are leading the way in the UV water sanitation field. Owners, users and operators no longer need settle for less than optimum water quality and user safety and comfort.

FLO-MASTER XP2 SPA PUMP - 48 FRAME			
2" Suction/Side Discharge			
Offers high performance while utilizing the same space requirements as most other applications			
Two Speed			
612-5000	\$ 547.58	B	2.5HP 230V
FLO-MASTER XP2E SPA PUMP - 56 FRAME			
2" Suction/Side Discharge			
Designed for today's large spas with multiple jets requiring increased flow. The XP2e pump fits within the same envelope as the original XP2 pump yet provides greater flow than its predecessor allowing spas to use more jets per pump. Reliable, the XP2e pump allows for the same and greater flow rate and overall energy efficiency of the spa while reducing consumer operation costs.

FLO-MASTER XP3 SPA PUMP - 56 FRAME			
2½" Suction, Side Discharge			
The XP3 pump, AquaFlo by Gecko's latest offering in its high performance spa pump line, is designed for today's large spas with multiple jets requiring increased flow and performance achieved through efficiency rather than brute force. The greater flow provided by the XP3 pump allows the use of more jets per pump and lower amp pump making the spa more energy efficient and reducing consumer operating costs.

SUCTIONS - VGB

VGB 2008 Compliant : The Waterway line of products meets or exceeds the demands of the Virginia Graeme Baker Act and can be trusted to perform for years to come. Suctions are available now for installation in new projects and replacements. Each suction fitting is marked with a waterflow rate in gallons per minute. This rate must equal or exceed the maximum flow rate of the pump(s) used in the water circulating system. Certain suctions can be used with a vacuum break fitting for an extra high rating. Call for details.

VENT FITTING			
Suction Vent - The suction vent is used in conjunction with the vacuum break fittings to induce air into the pump suction line.			
640-3750V	\$ 11.62	A	Vent Vacuum Break Inlet 3/4" Slip Barb VGB
VACUUM BREAK FITTINGS			
Vacuum Break Fittings - In case of obstruction of suction fitting openings the differential pressure causes air to be pulled into the pump suction line, as a result the pump will lose prime and breaks the vacuum behind the suction cover. Improves performance and safety. Increases UL approved flow rating. Complies with VGB & is UL tested to meet requirements of ASMEA112.19.8-2007 Call for details.

INSTA FIX			
Phyxall is a glue that works on oxygen deprivation, not on exposure to oxygen. This means it won't dry out when exposed to air, but forms a tighter bond the more it is deprived of oxygen.			
- Bonds in seconds - Sticks to aluminum, steel, copper, acrylic, porcelain, glass, rubber, hard PVC, ABS and most common plastics - Use for cracks or holes in pumps, filters, skimmers, maindrains, dial valves, pool cleaners, chlorinators, vinyl liners

HEAVY DUTY			
- Deluxe heavy-duty in-pool ladder - Totally adjustable for deck heights from 46" to 56" 5" x 18" wide - Flat treads for easier climbing - Includes deck platform - No sand required. - Features an anti-entrapment barrier - Optional #6000-EXT Extension Kit available to extend ladder to approximately 68 inches - Weight guideline: 300 lbs.			
CFR-LADDER-6000B	\$ 299.42	B	Heavy Duty In-Pool Ladder
SAFETY LADDER			
Roll-Guard A-Frame Safety Ladder			
The smart design prevents unauthorized pool entry when in the closed position, and restricts access behind the ladder when in the open position. The easy and unique roll-up and down design (similar to a garage door) eliminates the need to flip or spin the outer treads of the ladder to restrict access.

TRUSEAL DIVERTER VALVES

- Diverter valve seal is Teflon laminated silicone
- Unique TruSeal manufacturing process results in a seal that never needs lubrication
- TruSeal valves have deeper sockets than other valves providing better glue joint bonding
- The Twist-Seal Lock handle has 72 locking positions for virtually any setting desired
- Universal shaft spline pattern adapts to most actuators.

POOL SENTRY			
Keeps an eye on your water level so you don't have to. Maintains the water level of a pool, spa or pond automatically and unattended. The Pool Sentry is easily assembled by threading the fill tube into the float valve. The water stays on at all times when the Pool Sentry is in the pool. As the float drops, the water turns on. When the float reaches its set height, the water shuts off. The customer can adjust the float to any desired level, usually a point halfway on the tile line or skimmer.
